

COULD IT BE SEPSIS

If a child leaves your facility with ANY infection, provide the *checklist* to the parent or carer, and tell them:

- Infections and illness can change. If you think your child isn't improving or getting worse, return to hospital.
- You know your child best - trust your gut.
- Ask your doctor, nurse or health worker "Could it be sepsis?"

Download and share the *checklist* below.

Sepsis Family Support and Information

A child's diagnosis of sepsis is a life changing event. The Queensland Paediatric Sepsis Program wants families to be well supported and have access to useful information and resources.

You can scan the QR code to view and share the Family Support Program resources for families affected by sepsis.
