ieMR Advanced

## Fact sheet SurgiNet

**Children's Health Queensland (CHQ) will introduce a new integrated electronic medical record (ieMR) module – SurgiNet – as part of its ieMR Advanced Project rollout in April 2018.**

SurgiNet will replace the iSoft Operating Room Information System (ORMIS) and paper charts which are currently used to manage, track and schedule functions for operating theatres at the Lady Cilento Children's Hospital (LCCH).

SurgiNet is part of ieMR PowerChart and will enable perioperative staff to document and share information across all areas of surgery. This will help streamline surgical workflows and integrate patient and procedure information including:

- complex surgical procedure scheduling (supported by Enterprise Scheduling Management) for operating theatres
- patient case documentation for pre-operative, intra-operative and post-operative functions including the Post Anaesthetic Care Unit
- patient status and location tracking throughout the surgical process
- supply and configuration of clinical equipment for operating theatres based on surgeon, procedure, specialty and site-specific preference cards.

### Benefits for staff

- A single source of clinical information that is secure and current.
- Integrated clinical workflow and documentation for all areas of surgery
- Scheduling visibility across CHQ and other sites.

### Benefits for patients

Surgical procedure information will be integrated into a single medical record which supports patient pre- and post-surgical care, anaesthesia and medications management, and transfer and discharge information.

### Who is affected?

SurgiNet will be primarily used by the perioperative team, surgical nurses, clinical nurse consultants, and nurses and administrative staff in medical imaging. However, other nursing, allied health and clinical administration staff may also view information within the system.

### Training

An extensive training program will be implemented to ensure staff receive information and support before, during and following implementation of the new system.

### For more information please visit the Our Digital Future website or contact your ieMR Advanced Change Partner:

- Allied Health (excluding Pharmacy and Medical Imaging): Loretta Johnston
- Child and Youth Mental Health Service: Gemma Noakes, Meegan Palmer
- Clinical Support (including Pharmacy): Shiromi Arora, Madeline Offermann
- Critical Care (including Medical Imaging): Karen Gibb, Ruth Primmer
- Health Information Management Service: Denyse Hayes, Gabrielle Attewell
- Medicine: Denyse Hayes, Elanore Haynes, Gemma Noakes, Meegan Palmer
- Surgery and Perioperative Care: Jingyi (Rita) Tao, Julie Rees, Niamh Sterzl
