Continuous infusions: unchart

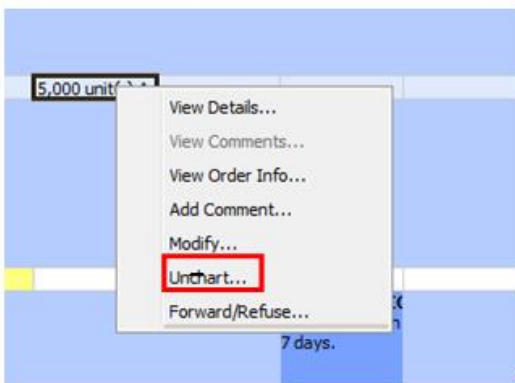

Quick reference guide

Continuous infusion events can be uncharted through the MAR if the medication was charted in error. To document this, follow the steps below:

1. Click **MAR** from the **Menu**.
2. Right click the **Continuous Infusion** event you need to unchart:

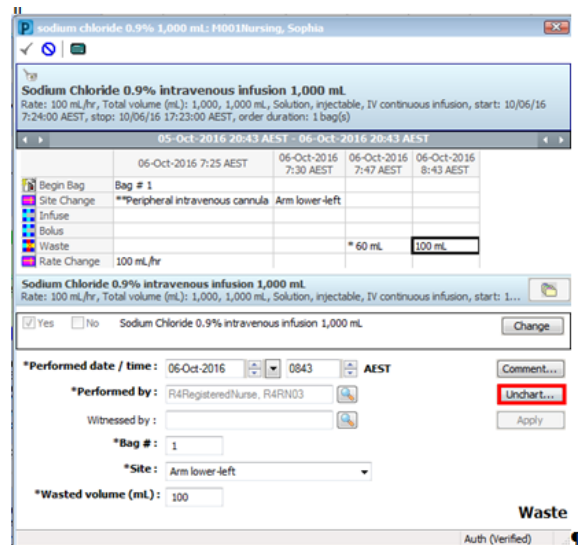

Rate Change 125 mL/hr

3. Select **Unchart...**

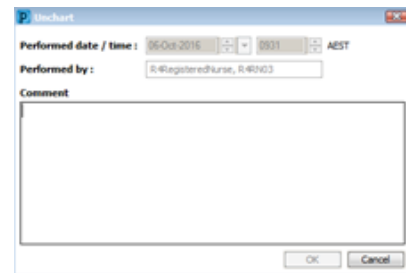

The **IV Administration** window will open.

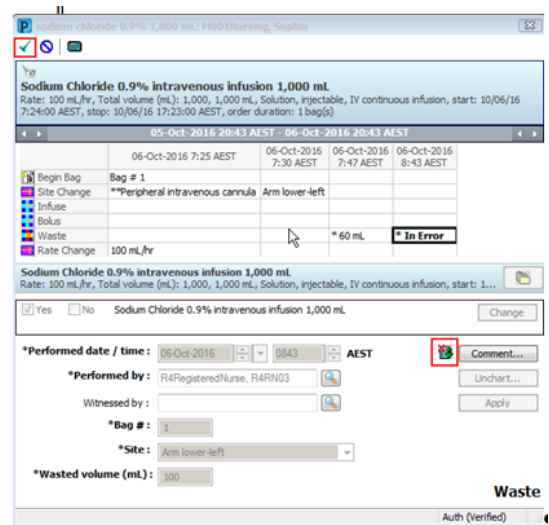

4. Click **Unchart...**

The **Unchart** window will open.

5. Free-text your reason for uncharting.
6. Click **OK**.
7. Click the green tick to sign.

Note: The  icon identifies a modified comment.

8. The uncharted result will appear as *** In Error** :

PRN	PRN	5 mg	
oxycodone 5 mg, Tablet, Oral, 4 hourly, start: 08/17/16 4:16:00 AEST, PRN for pain/fever		Not given within 7 days.
