## Document intervention ad hoc charting

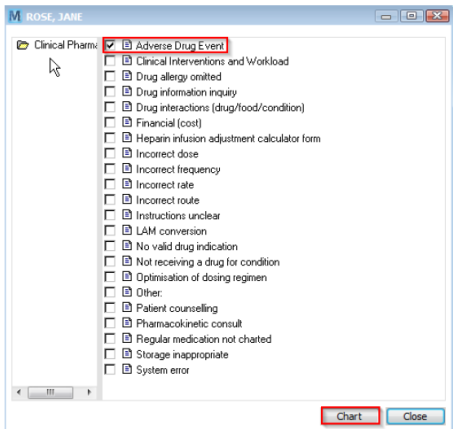

### PharmNet

#### Quick reference guide

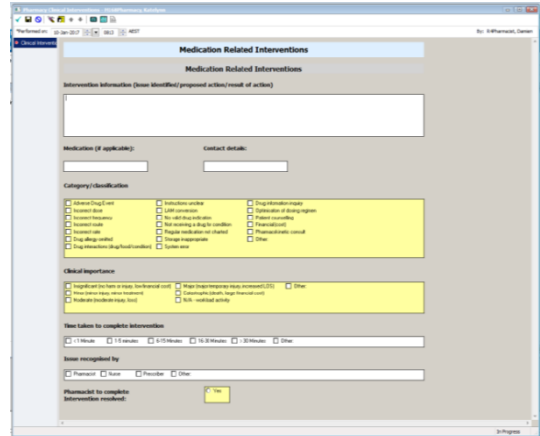

1. Login to the *Pharmacy Medication Manager* (also known as *PharmNet*) page.
2. Search the required patient profile (ensuring you are opening the appropriate patient encounter).
3. Navigate to *Rx Interventions* in the patient menu column (at the bottom left corner).
4. Click on the "Click here to add an intervention..." hyperlink.

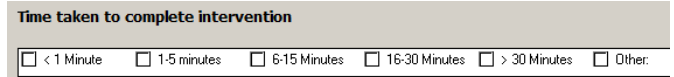

5. A new window will appear where an intervention type needs to be selected. Select the appropriate option then select *Chart* located at the bottom right of the window.

6. The below window will display. Yellow boxes are compulsory fields. There is also the free text box at the top of the window where information relating the intervention can be documented. There are also options to add information related to the intervention for statistics purposes.

7. Leave the *Time taken to complete intervention* button unchecked until the intervention is complete.

8. Leave the *Pharmacist to Complete Intervention Resolved* button unchecked until the intervention is complete. Sign the form ✓.

9. This intervention will now be displayed in the Patient's *Interventions* tab in PharmNet (as well as in the *Multi Patient Task List* in *Power Chart* and under the *Activities and Interventions* tab) for the individual patient. A progress note will be charted automatically.
