

## Enteral feed continuous – nurse administration

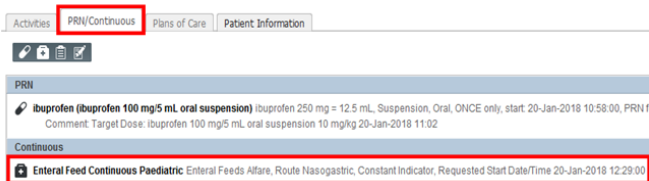

### Care Delivery

#### Quick reference guide

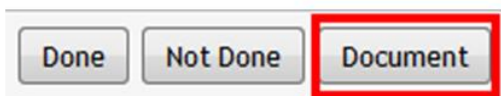

This QRG will assist nurses to commence and manage a Continuous Enteral Feed order.

**Note:** The workflow process is to document administration of the **Enteral Feed** order(s) via the **CareCompass** tasks.

1. In **CareCompass**, click the **PRN/Continuous** tab.
2. Click the **Enteral Feed Continuous Paediatric**.

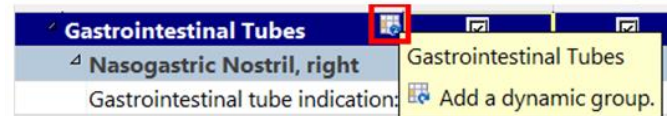

3. Click **Document**.

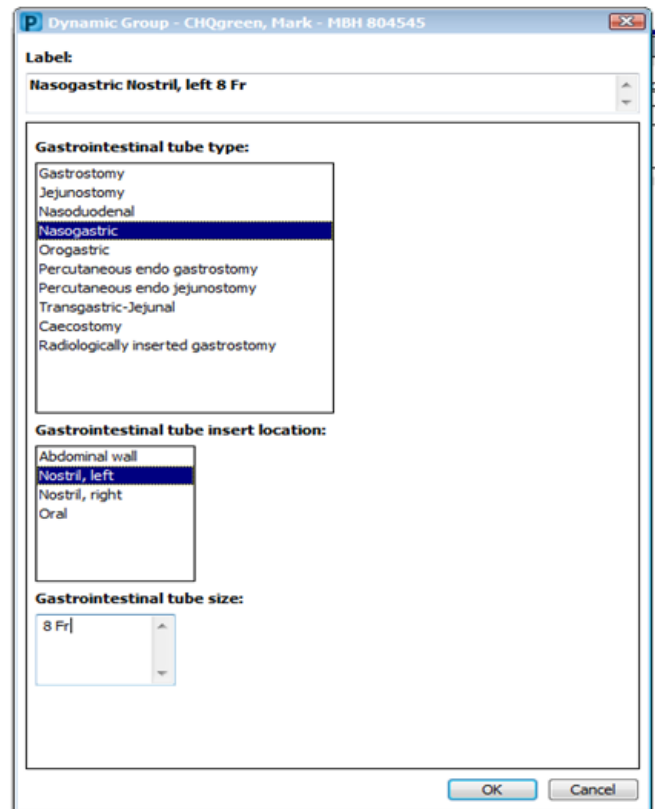

**Note:** This will navigate through to **Activity View** and take you to the **Gastrointestinal tubes** iView Band.

You will need to create a dynamic group if there isn't one already created.

4. Add a **gastrointestinal dynamic group** i.e. **nasogastric tube**.

5. Set up the dynamic group and select the correct **tube type**, **location** and **size**. Click OK.

6. Enter all relevant details in iView including the volume infused.
