FirstNet - patient summary report

Quick reference guide

The Patient Summary Report displays information relating to the patient's entire journey in Emergency. This report is particularly useful when you are required to review a patient's movements throughout the department, which staff were involved in their care or any events and orders placed on the patient.

Accessing the Patient Summary Report

From LaunchPoint, Right click on your patient and select Patient Summary Report

What is shown on the Patient Summary Report

The Patient Summary Report displays the following information.

1. **Patient Information** – Patient Demographic details eg Name, UR Number, DOB, Age etc
2. **Encounter Information** – Information relating to the current encounter eg Arrival Date/Time, Visit Reason, Diagnosis etc
3. **Tracking Information** – Patient's Length of Stay, Acuity (Triage Category) and the names of staff assigned to the patient and the times they were assigned and unassigned to the patient
4. **Event Information** – The events placed on the patient (eg Admit to Inpatient, Admit- Bed Ready etc) and the times these events were requested.
5. **Location Information** – The patient's location history
6. **Orders Information** – any orders placed for the patient and the order status eg Ordered, Completed.
