Interventions ad hoc charting

PowerChart

Quick reference guide

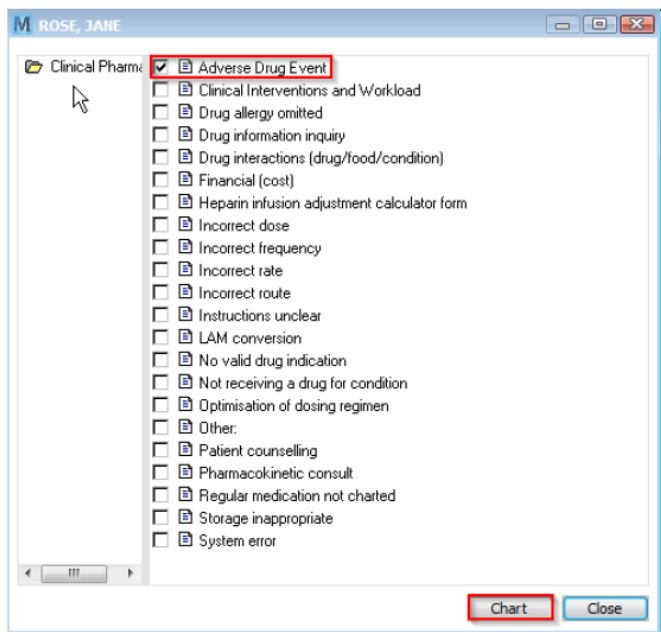

1. Log into *PowerChart*.
2. Select *Ad Hoc* charting from the toolbar.

OR

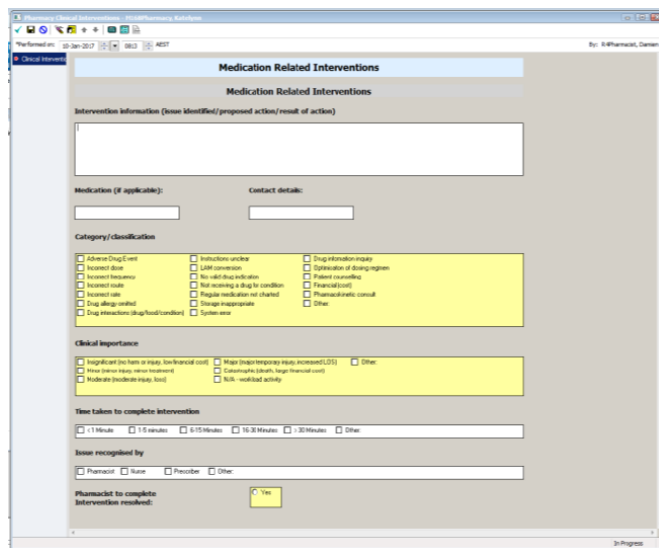

alternatively click on the tab *Chart*, followed by Ad Hoc Charting.

3. A new window will appear where an intervention type needs to be selected. Select the appropriate option then select *Chart* located at the bottom right of the window.

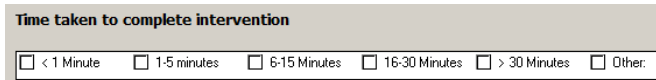

4. The below window will display. Yellow boxes are compulsory fields. There is also the free text box at the top of the window where information relating the intervention can be documented. There are also options

to add information related to the intervention for statistics purposes.

5. Leave the *Time taken to complete intervention* button unchecked until the intervention is complete.

6. Leave the *Pharmacist to Complete Intervention Resolved* button unchecked until the intervention is complete. Sign the form ✓.

7. This intervention will now be displayed in the *Multi Patient Task List* in *Power Chart* and under the *Activities and Interventions* tab for the individual patient. A progress note will automatically populate following signing the form.
