

Medication: administer additional dose

Quick reference guide

To administer additional medication dose, follow the steps below:

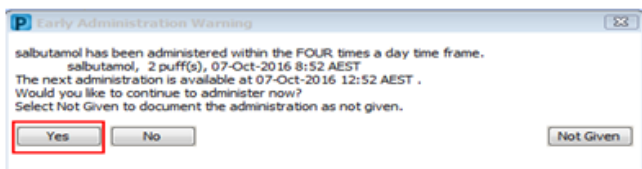

Note: Refer to your policies and procedures and only perform duties that fall within your scope of practice.

1. Click **MAR** from the **Menu**.
2. Right click on medication order and select **Additional Dose**.

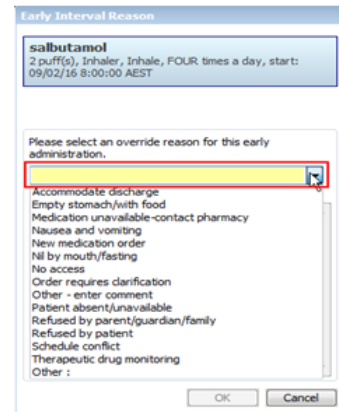

An **Early Administration Warning** window may display.

3. If **clinically appropriate**, click **Yes**.

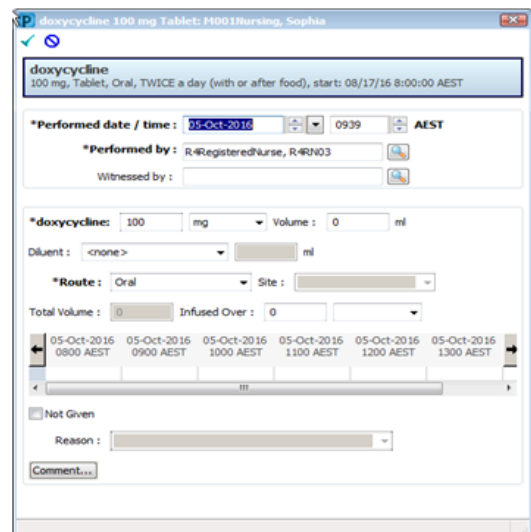

The **Early Interval Reason** window will open.

4. Select the appropriate reason for early administration (if **clinically appropriate**).

5. Click **OK**.
The medication administration window will open.
6. Complete the details as necessary.

7. A comment can be entered by clicking on the **Comment...** button in the medication administration window.
