Medication: withhold / chart not done

Quick reference guide

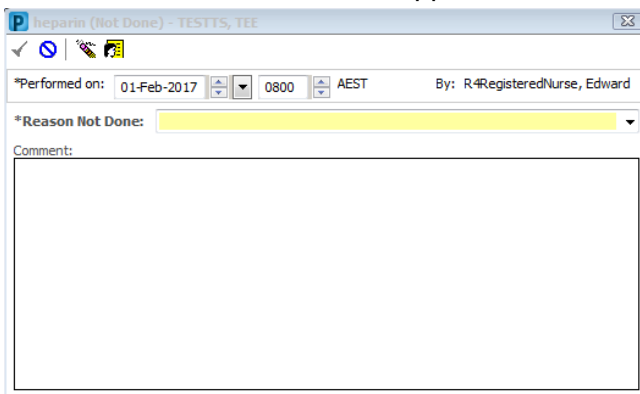

To withhold a medication for one dose as per a medical officer or to remove an administration task from the MAR (eg: an overdue task on an order that has been discontinued or suspended), use the chart not done function.

To document a **Chart Not Done**, follow the steps below:

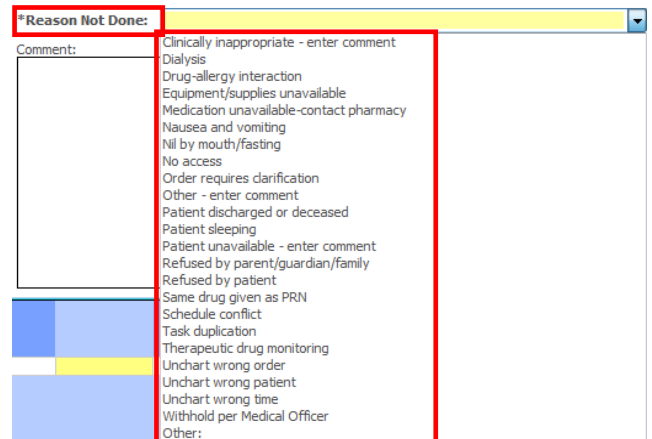

1. Click **MAR** from the **Menu**.
2. Right click on the medication and select **Chart Not Done**.

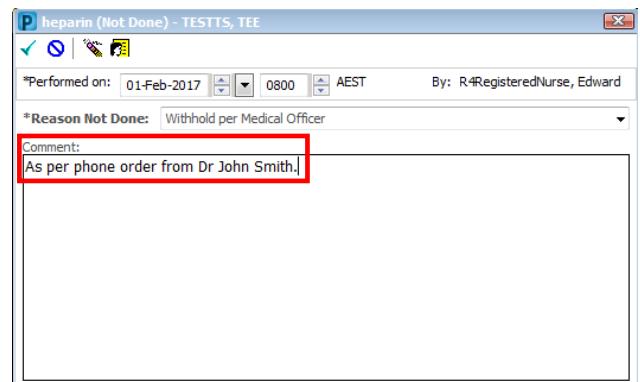

The **Not Done** window will appear.

3. Select an appropriate **Reason Not Done** from the drop-down menu.

4. Enter a comment.

Note: Be sure to always include a clinician's full name and designation.

5. Click the ✓ to sign.
6. Refresh the **MAR**.

The result section will now display **Not Done** and selected reason.

*** Not Done: Withhold per Medical Officer**

Note: An * indicates an associated comment. To view any comments, right click and select **View Comments**.
