

## Modify

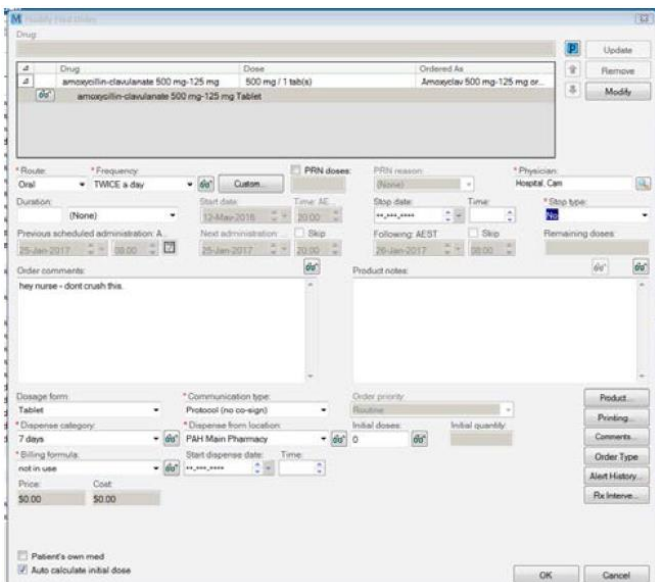

### PharmNet

#### Quick reference guide

1. Login to the **Pharmacy Medication Manager** (also known as **PharmNet**) page.
2. Search the required patient profile (ensuring you are opening the appropriate patient encounter).
3. From the **Acute Profile**, for orders which have previously been verified but need modification, choose the **Modify** action from the drop down box.

4. Click **Apply** and the following window will launch.

A screenshot of the 'Modify Order Details' window in the Pharmacy Medication Manager. The window displays various fields for editing an order, including drug name, dose, frequency, start date, and end date. The 'Apply' button is highlighted with a red border.

5. The same fields that could have been edited when performing a **Verify** action (see

relevant QRG) can be changed here (e.g. inputting AMS approval number retrospectively by clicking on comments and using the specified box). Any yellow fields are compulsory and must be filled.

6. To finalise, click **OK** then **Submit**.
