Neurovascular observations ordering and documenting FirstNet

Quick reference guide

Ordering the Neurovascular Observation Task

Neurological Observations can be ordered by the ED Clinician. This can be ordered by:

- Medical Officer
- EFC
- Zone Team Leader or
- Bedside Nurse

There are advantages in ordering versus entering directly into iView:

- When there is a clinically appropriate need for regular Neurovascular observations and frequency e.g. hourly due to the patient's acuity.
- The order will drop the task into the Nurse Activity navigator band and have available the appropriate DTAs (cells) to document against.

Ordering Neurovascular Observations

1. Navigate to the **Orders** tab in the **Menu** and click **+ Add**.
2. Search for "neurovascular paed" in the **Orders** search field and select either the **Upper Limb** or **Lower Limb** Neurovascular Observations Paediatrics. Click **Done**.

3. Complete the details within the **Order Entry Field (OEF)** include the **Frequency**.

4. Select **Sign** and verify by entering your **Novell** password.
5. The orders screen appears, **refresh** and the neurovascular order has a **tick** against it and is changes from **processing** to **ordered**.

6. On **LaunchPoint** the order displays in the **Nurse Activity** column to be available for documenting against.

Accessing the Neurovascular Observation Task

1. Navigate to **LaunchPoint Summary - Activities**.

Select the **Neurovascular Observations Paediatric** task and click **Document** → this will take you to **Activity View** within **Interactive View**.

2. Select the applicable limb that you wish to document against ("collapse" the non-applicable limb from the menu).

4. Click on the Blue reference text Hyperlink. This will display a decision support window to assist with assessment.

3. Once the clinician selects the appropriate limb, complete the clinically relevant documentation for the sections.

- a. Pain Assessment.
- b. Comfort measures.
- c. Specific Limb neurovascular Obs Paediatric.

5. When complete select the green tick to sign and verify the documentation – the purple text will change to black once verified.
