

Perioperative: urine dipstick POC testing adhoc powerform

Quick reference guide

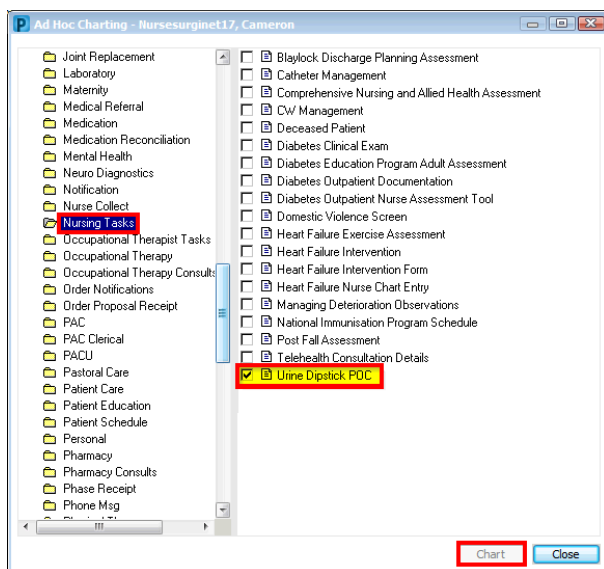

Documenting and recording POC (point of care) Urine dipstick results within the patient's EMR will be completed using an *AdHoc PowerForm*. AdHoc documents are task-specific templates with information to select from within the EMR. They are accessed by the *AdHoc* icon on the tool bar.

1. Open the patient's ieMR selecting the correct encounter
2. Click on the *AdHoc* icon.

The *Ad Hoc Charting* window will open.

3. Double click on the *Nursing Tasks* folder.
4. Select *Urine Dipstick POC*.
5. Click *Chart*.

6. Enter the results.

7. Click *Sign* ✓

FAQs

Will the results still print out on paper?

Yes, however you will transcribe this information into the patient's ieMR AdHoc document instead of attaching this printout to the POC Testing document and filing it in the chart.
