WTU – urine dipstick POC ordering activity and documenting results

Quick reference guide

Ordering and documenting a WTU dipstick result

This task can be ordered before the WTU is captured or retrospectively after the task is complete.

1. Navigate to **Orders**. In LaunchPoint Summary clicking on the orders button in LaunchPoint

Summary **Orders** or Orders Add button on the First Net menu bar.

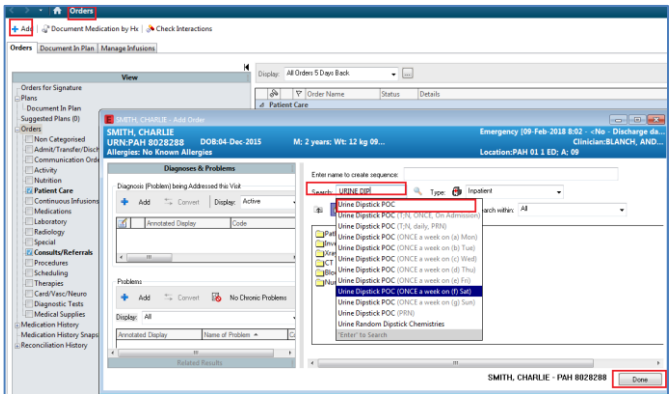

2. The **Orders** screen will display.

Search for **Urine dipstick POC** and select appropriate **order sentence**.

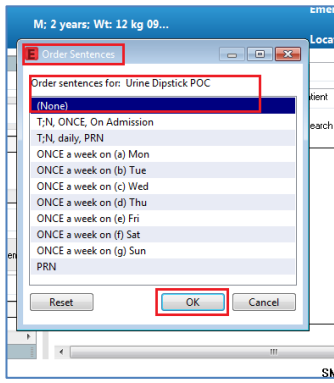

As there isn't an appropriate order sentence select the order with no sentence.

Click **Done**.

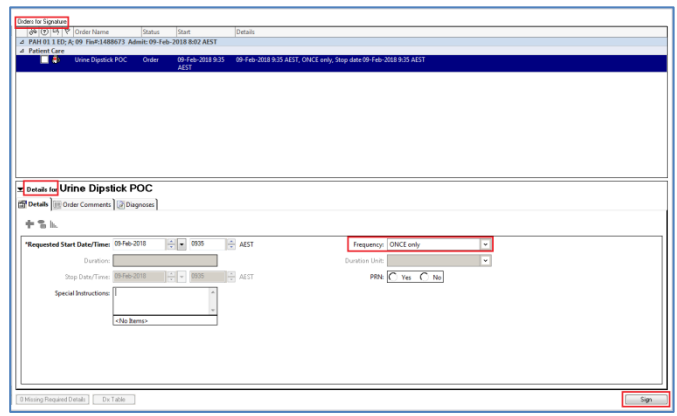

3. An **order sentence** screen will display.

As there is no order sentence for a **once only (stat)** BGL Urine dipstick select **(None)** and **OK**.

4. This will open in **Orders for signature** screen. In the **details** section enter **Once only** and **sign**.

5. Enter password and refresh the orders screen.

The order will change from **processing** to **ordered** with an **order sentence** and a tick against the order.

The **Urine Dipstick result** can now be entered.

6. Navigate to **LaunchPoint** to view the order by hovering over the number in the **Nurse**

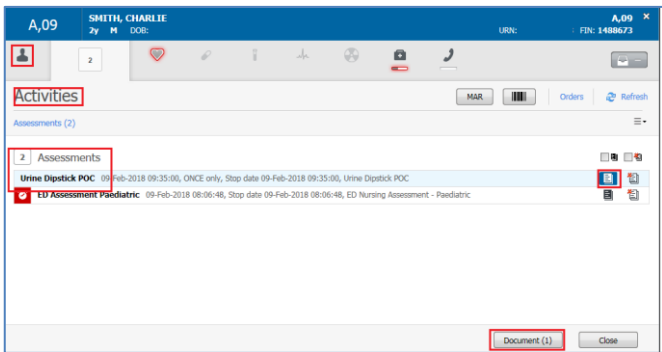

Activities column.

Review and click on the number.

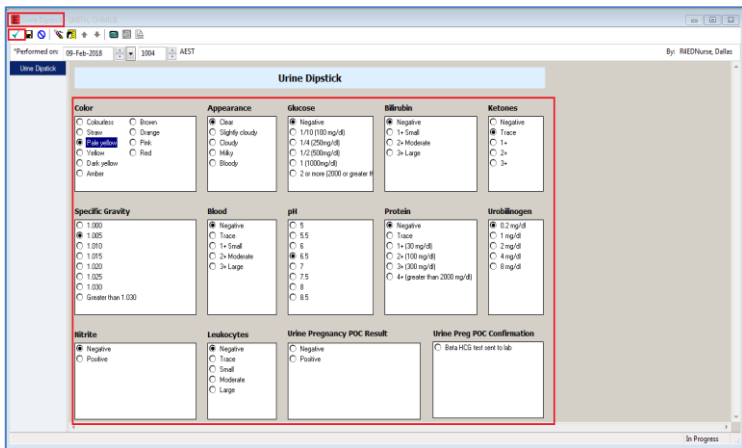

7. Navigate to **LaunchPoint Summary- Activities** click on the document icon and **Document**.

A **Urine Dipstick PowerForm** will display.

Select **clinically appropriate areas only**.

Click  to **sign off** the PowerForm.

8. Clinicians will then be able to review the **results**

in iView via the **Point of Care Testing Information** section.
