

Ordering Miscellaneous Pathology

Quick Reference Guide

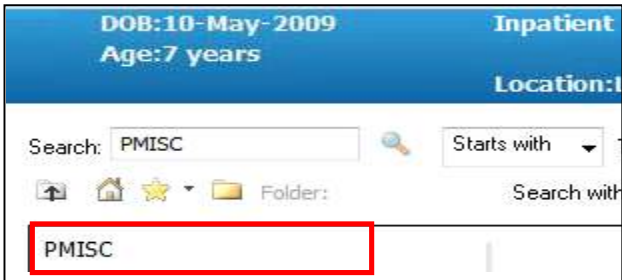

How to Order Miscellaneous Pathology

If you cannot find a pathology order or are unsure of the order name to search for, you can look in the Pathology Queensland quick link on the ieMR toolbar. Alternatively you can place the order using the *Miscellaneous Pathology* order.

1. While in the *Orders* section of the patient's chart, Click the **+Add**  icon in the top left of the *Orders* profile page. Or, click **+Add** in the patient Menu next to *Orders*.

2. Enter *PMISC* into the search field and select the order by single clicking

3. Click *Done*  to return to the *Orders for Signature* window
4. Click on the *PMISC* order and complete the mandatory fields (*yellow fields*).

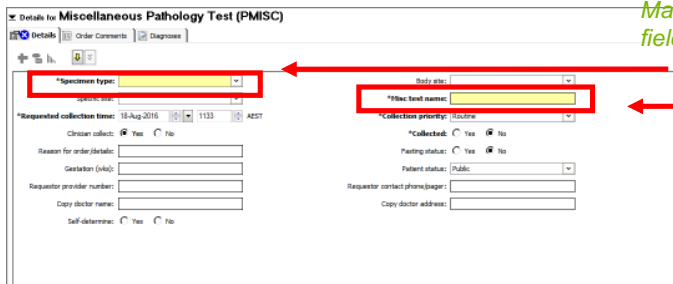

Be as specific as possible. The requested test will be transmitted to the pathology exactly as typed in the *Misc test name* field, specifying type of test (e.g. level, screen, quantitation, PCR etc.), this will ensure the appropriate test is performed.

If multiple miscellaneous tests are required on the same order, enter all tests in the 'order details field' separated by a comma (e.g. CGH Array, Charcot Marie Tooth gene analysis)

4. Specify the *Specimen Type* e.g. Blood, Aspirate, Fine needle aspirate
5. Name the test in the *Misc Test Name* field e.g. Charcot Marie Tooth gene analysis
6. Enter any further details into *Reason for order/details*
7. Complete any other *fields* as appropriate

Mandatory fields

8. Click *Sign* , enter your password and then click **OK** to finalise the order.
