Do you work with children and young people with persistent pain?

Project ECHO can support you in your work through **case-based learning** and topic discussions. Bring your de-identified cases for advice and support. Join our interprofessional **community of practice** meetings online.

Unresolved persistent pain in childhood incurs a high risk for pain disorders, physical symptoms, and mental health problems later in life.

**Paediatric Persistent Pain ECHO Network**

**Tuesdays 12-1pm Queensland (AEST) time**

**11th February – 20th October 2020**

(session every 4 weeks)
