Unchart/modify medication results

Medication Management

Quick reference guide

Medication results can be **uncharted** or **modified**, if required, through the **MAR**.

Unchart Medication Results

1. Click **MAR** from the **Menu**.
2. Right click on the scheduled medication task to be uncharted.
3. Select **Unchart**.

The **Unchart** window will open.

4. Enter a comment explaining the reason for uncharting the documentation.

5. Click the green tick to sign.

6. Refresh the page.

The uncharted result will appear as ***In Error**.

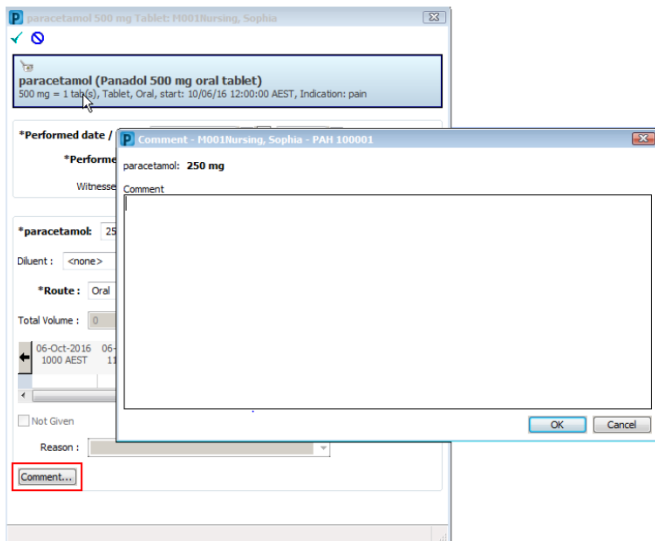

Modify a Charted Task

1. Click **MAR** from the **Menu**.
2. Right click on the scheduled medication task to be modified.
3. Select **Modify**.

The medication administration window will open.

- Modify the required details.
- Click **Comment...**
- Enter a comment regarding your modifications and then click OK.

- Click the green tick  then refresh the page.

The result will display now as **modified** with a (c) to identify that there is a comment.
