

# LCCH PES 19" Touch Screen

## Power:

There are two ways to power the terminal. On/Off button on front of terminal puts screen into sleep mode. A power button underneath the Terminal bottom right that will shut down the unit. When the shutdown button is used the same button must be used to repower the Terminal.

## Navigation:

The terminal can be navigated using the touch screen. Please note it is a single touch panel and not multi touch swipe (drag and drop). The PES Handset can also be used with simple left right up down and OK menu navigation.

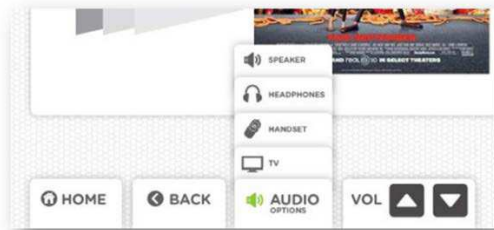

## PES Wall Handset:

The volume up and down buttons are located on the side of the handset. The button at rear of handset is volume amplification. The mute button on both handset and terminal screen will mute all audio sources.

## Audio Control

There are multiple audio sources available which are dependent upon the bed location and room configuration. Within each section of the PES, when the screen or handset is touched, a pop up menu appears with user features that relate to the area you are in. You are able to select your preferred Audio Source. E.g. Parent Speaker, Headphones, Handset or Terminal.

## What's on?

For Hospital opening the PES will have all Free to Air TV stations, and selected Foxtel, Radio and touch screen games.
