Share information openly and honestly so families can make informed decisions

It is important that you know about these options and opportunities

Being well informed will help us make decisions that suit our child and family

We place children and families at the heart of everything we do

Families are:
• The constant in their child’s life
• Experts about their child
• Different from other families

We know our child better than anyone and this is how things work for us

This helps me understand you and your family

We place children and families at the heart of everything we do

Families and clinicians are partners in a child’s care

We are really keen to work with you

You are part of our health care team

We place children and families at the heart of everything we do

Every family has strengths. Let’s use them!

This is what works well for our family... and this didn’t work for us

I understand what is special about your family

We place children and families at the heart of everything we do
